Strong Arming Cellulite - Skeyndor Body Slindy

The new Skeyndor Body Slindy treatment is a four-step anticellulite strategy. Ginkgo and Casia (Chinese Cinnamon) work in tandem to coax toxins and wastes out of fatty areas, encourage fat breakdown, draw off excess fluids, boost circulation, aid in fat cell reduction and increase metabolism and blood flow to the affected areas. To amplify results, Skeyndor has two home care products: Body Slindy

Stubborn Cellulite Reducing Gel - designed for the treatment of hard compact cellulite and orange peel skin and Body Slindy Cellulite Drainer Shaping Emulsion - treats softer cellulite and excesses around the waist and abdominal area, often more apparent with ageing.
