### Lygia Barnett discovers the benefits of longer lashes

Say goodbye to your beloved mascara and say hello to long, luscious lashes. To coincide with the Spring Racing Carnival, I stopped by for lash extensions at Melbourne's Love Those Lashes.

In just under an hour, premium quality extensions were individually grafted to each eyelash with a specially formulated glue. Did it hurt? No. Was I impressed? Yes!

As someone who has never been able to flutter her eyelashes, this was great. The look was pretty impressive and totally eliminated the need for mascara.

Lash extensions are a beauty splurge for anyone who wants to look preened 24/7 but doesn't have the time to apply make-up throughout the day (check!). The only downside is that you have to take extra care when washing and drying your face, as they may fall out. A small price to pay for flawless lashes!
